DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

New corrected drawings are requested in this application because at the top of each drawing "WO..." and "PCT..." should be removed.

Specification

The abstract of the disclosure is objected to because it should be presented on a separate page. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: Headings for each major section of the specification is recommended.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2817

In claim **1**, part d, "said output signal" lacks proper antecedent basis. See also claim **9**, line 9, **10**, line 3.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,3,8,9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferraiolo et al(US 5,694,087 cited by applicant).

The reference by Ferraiolo et al discloses a PLL with counter means(1,2) with clock inputs receiving the reference(counter 1) as a threshold frequency and counter 2 receiving the vco output. A latch (switch) allows for the change control and blocking signal to suppress the supply of the control signal to the vco. See abstract figure and col. 2.

Allowable Subject Matter

Claims 4-7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 7,095,287 , see fig. 2, shows a PLL with blocking

Art Unit: 2817

means(302,304) and counter 224, however, the date is after the foreign priority provided by applicant.
